WEBSITE DEVELOPMENT / DOCUMENT 02 — ANSWERS

Product Requirements Document

Completed questionnaire for the Radiant Institute of Professional Studies (RIPS) website, rips.edu.pk

PREPARED FOR	Radiant Institute of Professional Studies (RIPS), Sheikhupura
PROJECT NAME	RIPS website rebuild — rips.edu.pk
DATE / VERSION	17 October 2026 / v1.0 draft answers
SCOPE	129 core questions | 15 sections | 6 feature worksheets
FOLLOWS	Project Vision & Scope answers dated 17 Oct 2026 (draft v0.1, not yet approved)

How to read this document. Answers are drafted from the institute's public pages and the rebuild plan. Items marked **Not Decided** need a management decision. Items marked *(confirm)* or *(proposed)* are suggestions that management must confirm before they become requirements. **Not Applicable** means outside the first release. Fee amounts, dates, eligibility rules and affiliation wording were not available and must come from admissions and management.

QUESTIONNAIRE DIRECTORY

Contents

A	Product Baseline & Decision Ownership	7 questions
B	Outcomes, Value & Success Measures	7 questions
C	Audiences, Personas & Eligibility	8 questions
D	User Journeys & Key Workflows	9 questions
E	Features, Priorities & Scope Boundaries	10 questions
F	Pages, Navigation & Discoverability	9 questions
G	Accounts, Authentication & Permissions	8 questions
H	Forms, Files, Content & Data Lifecycle	10 questions
I	Search, Notifications & Communication	7 questions
J	Transactions, Bookings & External Services	10 questions
K	Administration, Operations & Moderation	7 questions
L	UX, Devices, Accessibility & Localization	9 questions
M	Privacy, Trust, Security & Quality Expectations	9 questions
N	Measurement, SEO & Product Learning	8 questions
O	Delivery, Acceptance & Release Planning	11 questions
F	Feature requirement worksheets (FEAT-001 to FEAT-006)	6 worksheets
✓	Approval and completion check	

SECTION A / 7 QUESTIONS

Product Baseline & Decision Ownership

Confirm the product context and who can make binding product decisions.

001. What is the official product or website name, working version, and intended launch market?

> **Name:** Radiant Institute of Professional Studies (RIPS), Sheikhupura, website at **rips.edu.pk**. One official spelling must be fixed (old pages mix “Radiant” and “Radian”; social pages say “Radiant University”) *(confirm)*.
>
> **Working version:** v1.0 (first release).
>
> **Launch market:** Sheikhupura city and district, Punjab, Pakistan, with reach into nearby cities such as Lahore, Gujranwala, Nankana Sahib and Hafizabad *(confirm)*.

002. Which approved Project Vision & Scope document should this PRD follow (version/date), and have any decisions changed?

> The **Project Vision & Scope (PVS) answers dated 17 Oct 2026**, draft v0.1. It has **not yet been formally approved**, so record its approved version and date here at sign-off.
>
> No decisions have changed. This PRD turns the PVS into testable product behaviour.

003. Who is the product owner, and who has final authority to approve requirements, priorities, and scope changes?

> **Not Decided**. Proposed: the **Director** (Muhammad Ayyub Bhatti) owns the product day to day; the **Chairman** (Colonel (R) Ghulam Mustafa Hussain) holds final authority. Management should name **one** person who can approve requirements, priorities and scope changes, so instructions never conflict *(confirm)*.

004. Which stakeholders must review this PRD, and what does each person approve?

Stakeholder	Approves
Chairman	Overall direction, launch go-ahead
Director	Scope, feature priorities, budget, timing
Principal (M. Ramzan)	Program list, academic content, Principal's message
Heads of department (e.g. Pharmacy)	Program pages for their department
Admissions office	Fees, eligibility, dates, enquiry process, merit lists
Developer	Technical feasibility and security

Names and roles to be confirmed by management.

005. What kind of product is being delivered in its first release: informational website, online service, marketplace, customer portal, or another type?

> An **informational website with lead generation** (online enquiry, WhatsApp, downloads). It is not an online service, marketplace or portal in v1.

006. What is the single most important user outcome the product must deliver in its first release?

> A prospective student or parent, on a phone, can find a program, see its eligibility, fees and dates, and send an enquiry or open a WhatsApp chat in under two minutes.

007. Which decisions are already fixed, which are flexible, and which remain undecided?

Status	Decisions
Fixed	Domain rips.edu.pk (managed at DOMAIN.pk); old WordPress site retired; new site hand-built in VS Code; mobile-first; no payments, accounts or student portal in v1; English is the main language
Flexible	Urdu pages in v1 or later; admin tool; size of news and gallery; faculty profile depth; exact launch date (except the safety fix)
Undecided	New host; where institute email lives; budget; launch date; final approver; exact program list and fees; form service; competitor list

SECTION B / 7 QUESTIONS

Outcomes, Value & Success Measures

Translate the project vision into observable product outcomes.

008. What are the top five user problems the first release must solve, in priority order?

> 1. The official site is hacked and unsafe, so there is no trustworthy official presence.
> 2. Programs, eligibility, fees and admission dates cannot be found in one place.
> 3. Affiliation and approvals cannot be verified easily.
> 4. Enquiring is hard outside office hours.
> 5. Notices and merit lists are scattered across social media.

009. What value should a first-time visitor understand within the first 10 seconds?

> "RIPS is a Sheikhupura institute offering health-science, computing and business degrees — see programs, fees and affiliation, and enquire in one tap." The top of the home page shows the name, that line, and three buttons: **Programs**, **Admissions**, **Enquire / WhatsApp**.

010. What are the primary actions users should complete on the website (for example, enquire, register, book, or buy)?

> - Submit an enquiry
> - Start a WhatsApp chat or call
> - Download the prospectus and fee structure
> - Check admission dates and steps
> - View notices and merit lists
> - Get directions to campus
> - Later: apply online, book an Open Day

011. Which business or organizational outcomes are expected from those actions?

> - More admission enquiries and enrolments
> - Fewer repeat phone questions for admissions staff
> - Stronger credibility with parents
> - Less reliance on third-party listing sites
> - One official place for notices

012. What measurable goals will indicate success in the first 30, 90, and 180 days after launch?

Period	Goal (proposed; confirm after baseline)
30 days	All must-have pages live and indexed; no security warning; enquiry form delivering 100% of test and real submissions; first real enquiries received
90 days	At least 50 website or WhatsApp enquiries; searching "RIPS Sheikhupura" shows rips.edu.pk first; pages load under 3 s on 4G
180 days	At least 150 enquiries across the intake; top-3 Google results for "[program] admission Sheikhupura"; fewer repeat phone queries (target to set from baseline)

013. What are the baseline figures or assumptions for those goals, and who will validate them?

> **Not Decided**. Baselines still needed: enquiries per intake, daily phone and WhatsApp enquiry volume, and Facebook and Instagram reach. The **admissions officer** collects them and the **Director** validates them. Until then every number above is an assumption.

014. What specific outcomes would make the first release a failure or require major changes?

> - Another security incident or a Google "dangerous site" warning
> - Enquiries below baseline after 90 days
> - The enquiry form not reaching admissions
> - Wrong fees, dates or affiliation published
> - Staff unable to update notices without the developer
> - Pages slower than 5 s on 4G

SECTION C / 8 QUESTIONS

Audiences, Personas & Eligibility

Define what each audience needs to accomplish rather than just its demographics.

015. Which user segments or personas must the product serve on day one?

- **Prospective student** (finished intermediate)
- **Parent or guardian**
- **Current student** (notices, merit lists)
- **Admissions officer** (internal)
- **Content editor and site administrator** (internal)

016. For each persona, what is the main goal or job they are trying to complete?

Persona	Main goal
Prospective student	Find the right program and learn whether they qualify and can afford it
Parent or guardian	Check the institute is genuine: affiliation, fees, safety, outcomes
Current student	Find the latest notice or merit list quickly
Admissions officer	Receive enquiries and follow them up
Content editor	Post updates without a developer
Administrator	Keep the site safe, backed up and online

017. What triggers a person to visit the website, and what information do they have when they arrive?

Triggers: intermediate results, an admission ad or Facebook post, a friend's tip, a Google search such as "pharmacy admission Sheikhupura", or a poster QR code. They usually arrive on a phone knowing only the institute's name and one program, unsure of fees and eligibility.

018. What frustrations, trust concerns, or barriers might prevent each persona from completing the desired action?

- Unfamiliar institute and doubt about affiliation (both personas)
- Fees hidden or unclear
- Slow pages on mobile data
- English-only text for some parents
- Long forms and fear of spam calls
- Memory of the hacked or fake-looking site

019. Which users may browse anonymously, and which must identify themselves?

All visitors browse anonymously. They identify themselves only by submitting an enquiry (name and phone). Staff must log in to the admin area.

020. Are there age, location, membership, organizational, or eligibility restrictions on who can use any feature?

Browsing has no restriction. **Program eligibility** (for example intermediate subject groups and minimum marks) differs per program and must be supplied by admissions as set by the affiliating university and professional councils *(confirm)*. Any later online application must collect a guardian's details for applicants under 18.

021. Which staff, partners, suppliers, or administrators also need workflows inside the product?

Staff only: admissions officer, content editor and site administrator. Heads of department supply content but do not log in. No partners or suppliers in v1.

022. Which personas are explicitly not supported in the first release?

> Logged-in students or parents, alumni accounts, international-applicant workflows, hospital and employer portals, and vendors.

SECTION D / 9 QUESTIONS

User Journeys & Key Workflows

Describe the complete user experience, including alternate and failed paths.

023. What are the three most important end-to-end journeys users must be able to complete?

> 1. **Find a program → check eligibility and fees → enquire.**
> 2. **Check admission dates and steps → download prospectus → contact or visit.**
> 3. **Current student: find the latest notice or merit list.**

024. For each journey, what is the entry point (search engine, advertisement, referral link, homepage, email, or direct link)?

Journey	Entry points
1 Find a program	Google search, Facebook or Instagram post, link shared on WhatsApp, home page
2 Admission steps	Home page “Admissions” button, poster QR code, direct link in an ad
3 Notices and merit lists	Notices strip on the home page, link posted on social media or WhatsApp

025. What steps should users complete from entry to successful outcome?

Journey	Steps
1	Land → choose program → read page → tap Enquire → fill form → see confirmation
2	Open Admissions → read steps and dates → download prospectus and fee PDF → enquire or WhatsApp
3	Open Notices → pick the notice or merit list → open the PDF

026. What information, options, or decisions must be presented at each important step?

> - **Program page:** duration, eligibility, fee, affiliation, career paths, Enquire button
> - **Form:** six main fields, privacy line, consent checkbox
> - **Admissions:** dates, documents needed, fee structure, scholarships, how to apply
> - **Notices:** title, date posted, program, file size and file

027. What counts as successful completion of each journey, and how should the user know it succeeded?

Journey	Success and what the user sees
1	Enquiry delivered. On-screen “Thank you — admissions will contact you within 1 working day” plus an auto-reply email
2	File downloads, or an enquiry or WhatsApp message is started
3	PDF opens and shows its publication date

028. What should happen when a user abandons, pauses, revisits, or resumes a journey?

> There are no accounts, so nothing is saved on the server. The browser may keep typed form values if the page reloads. On return, content is the same; the WhatsApp chat history persists in WhatsApp. No reminder emails in v1.

029. Which steps require confirmation, review, cancellation, editing, or undo?

> Visitors: the form submits once and cannot be edited; to correct or withdraw, the visitor replies to the auto-reply email or WhatsApps admissions. Staff: a confirmation prompt before deleting or replacing a notice, fee table or merit list.

030. What should happen when an input is invalid, a required service is unavailable, or the user is not eligible?

> - **Invalid input:** inline plain-language message, e.g. “Enter a mobile number like 03xx-xxxxxxx”.
> - **Service unavailable:** clear message plus phone, WhatsApp and email alternatives.
> - **Not eligible:** eligibility is stated on the program page; the form does not block, and admissions advises the person.

031. Which journeys must work without creating an account?

> All three public journeys. Only staff administration needs a login.

SECTION E / 10 QUESTIONS

Features, Priorities & Scope Boundaries

Record the product behavior expected from each feature and its release priority.

032. What is the complete inventory of proposed product features (use the reusable feature worksheet at the end for each feature)?

ID	Feature
F1	Home page
F2	Program index and program pages
F3	Admissions information (process, eligibility, fees, dates, scholarships)
F4	Enquiry form
F5	WhatsApp click-to-chat, call button, contact page and map
F6	Downloads (prospectus, fee structure, forms)
F7	Notices and merit lists
F8	News and events
F9	About, leadership, affiliation and approvals
F10	Faculty directory
F11	Campus, facilities, gallery and video
F12	Careers
F13	Privacy policy and legal pages
F14	Staff content updates (light admin)
F15	Email alert to admissions on each enquiry
F16	SEO and analytics
F17	Urdu pages
F18	Online application with document upload
F19	Open Day or campus-visit booking
F20	Site search

> Worksheets for the six core features (program pages, admissions information, enquiry form, notices and merit lists, WhatsApp and contact, staff content updates) are at the end of this document.

033. For each feature, which persona needs it and what user problem does it solve?

Feature	Persona	Problem solved
F2 Program pages	Student, parent	Cannot find what each program offers
F3 Admissions info	Student, parent	Unclear fees, dates and steps
F4 Enquiry form	Student, parent	Hard to enquire outside office hours
F5 WhatsApp, contact	Student, parent	Wants a fast, familiar way to talk to admissions
F6 Downloads	Student, parent	Needs the official prospectus and fee sheet
F7 Notices, merit lists	Current student, applicant	Updates scattered across social media
F9 About, affiliation	Parent	Cannot verify the institute is genuine
F14 Staff updates	Admissions, editor	Every change needs a developer
F16 SEO, analytics	Management	Cannot be found, cannot measure

034. Which features are Must-have, Should-have, Could-have, and Won't-have for the first release?

Priority	Features
Must	F1 Home, F2 Programs, F3 Admissions, F4 Enquiry form, F5 WhatsApp and contact, F6 Downloads, F7 Notices and merit lists, F9 About and affiliation, F13 Privacy policy, F15 Email alerts, F16 SEO and analytics; plus HTTPS, mobile layout and spam protection
Should	F8 News and events, F10 Faculty directory (names and roles), F14 Staff content updates
Could	F11 Gallery and video, F12 Careers, F17 Urdu (key pages), F20 Site search
Won't (v1)	F18 Online application and F19 Open Day booking (phase 2); payments, student portal, LMS, mobile app, live chat, user accounts

035. Which features are dependencies for other features, and in what order must they be available?

1. Content ready (program list, fees, dates, affiliation papers) and host plus DNS decided
2. Core pages: Home, Programs, Admissions, About, Contact
3. Enquiry form with email delivery and the privacy policy
4. Notices and merit lists with a staff update method
5. SEO and analytics (needs the privacy notice)
6. Launch
7. Phase 2: Urdu, online application (needs secure storage and a CNIC-data policy), Open Day booking

036. What must users be able to see, enter, submit, change, delete, or retrieve through each major feature?

Feature	Visitor can	Staff can
Program and admission pages	See, download PDFs	Edit text, dates and fees
Enquiry form	Enter and submit; ask admissions to correct or delete later	View, mark status, export, delete on request
Notices and merit lists	See and download	Add, edit, archive, delete
Contact and WhatsApp	See details, open chat or call	Update numbers and hours

037. What business rules or conditions determine whether each feature is available or allowed?

- A program is shown only after its affiliation and approval are confirmed.
- Fees and dates are published only after admissions and the Principal approve them.
- An enquiry needs name, valid phone, program and consent.
- Only the admissions officer publishes merit lists, after approval.
- Notices move to the archive after the intake closes.

038. What result or confirmation must each feature produce when it works correctly?

- **Form:** on-screen thank-you, auto-reply email, and an email to admissions.
- **WhatsApp:** chat opens with a pre-filled message such as “Hello RIPS, I would like information about [program]”.
- **Downloads:** the file opens.
- **Staff update:** change visible on the live site within about 5 minutes.

039. What limitations, usage caps, eligibility rules, or exceptions apply to any feature?

- Form spam limit: for example 5 submissions per hour per device (proposed).
- Staff PDF limit: 5 MB each; images compressed to about 1 MB.
- Visitors cannot upload files in v1.
- Fees and eligibility vary by program and intake.
- Scholarship wording (for example the early-applicant discount advertised on the old site) is published only if the Director confirms it.

040. Which potential features are explicitly excluded from the first release, and why?

Excluded	Why
Online fee payment	No gateway chosen; extra security and legal work
Student portal, LMS	Needs accounts and a data model; planned phase 3
Mobile app	Website first
Staffed live chat	No staff capacity; WhatsApp covers it
Hostel or transport booking	Not confirmed that these exist
Online MBA or distance programs from the old site	Unverified; may be template filler
Public reviews or comments	Needs moderation

041. What criteria will be used to accept, defer, or reject new feature requests after this PRD is approved?

A request is accepted only if it (1) supports a PVS objective, (2) helps enquiries or safety, (3) fits before the next intake, (4) adds no new personal data without a privacy check, and (5) is approved in writing by the approver. Everything else goes to the phase 2 backlog and is ranked Must / Should / Could.

SECTION F / 9 QUESTIONS

Pages, Navigation & Discoverability

Define what each page enables users to do, without specifying final visual designs.

042. What pages, screens, and major sections are required in the initial release?

Page	Release
Home	v1
About (overview, messages, leadership, affiliation and approvals)	v1

Page	Release
Programs index and one page per program	v1
Admissions (process, eligibility, fees, dates, scholarships)	v1
Notices and merit lists	v1
Contact (map, phone, WhatsApp, email)	v1
Privacy policy	v1
Thank-you page and 404 page	v1
News and events	v1 (should)
Faculty	v1 (should)
Campus and gallery	v1 (could)
Careers	v1 (could)

A temporary “website coming soon” page with contact details is needed **immediately**, before the full launch.

043. What is the primary purpose and target user of each page?

Page	Purpose	Target user
Home	Explain RIPS and route to Programs, Admissions, Enquire	Everyone
About	Build trust: who runs RIPS, affiliation and approvals	Parent
Programs	Compare and understand each program	Student, parent
Admissions	Show how, when and what it costs to apply	Student, parent
Notices and merit lists	Publish official updates	Current student, applicant
Contact	Make it easy to reach admissions	Everyone
News and events	Show the institute is active	Student, parent
Faculty	Show qualified staff	Parent
Privacy policy	Explain data use	Anyone submitting a form

044. What primary action should be available on each page?

Page	Primary action
Home	Enquire or WhatsApp
About	Download affiliation letters; contact
Programs	Enquire about this program
Admissions	Download prospectus; Enquire
Notices	Open the PDF
Contact	Call, WhatsApp or get directions
News and events	Read the post
Faculty	None; browse
Privacy policy	Contact admissions to exercise data rights

045. What information and content must appear on each page?

- **Home:** name and logo, one-line value statement, program cards, admission dates strip, latest notices, why choose RIPS (only verified facts), contact strip.
- **Program page:** name, level, duration, eligibility, fee, affiliation or recognition, outline, career paths, faculty or HOD, Enquire button.
- **Admissions:** steps, documents needed, dates, fee structure, scholarships, prospectus link.
- **About:** introduction, vision and mission, Chairman's, Director's and Principal's messages, leadership list, affiliation and approval letters.
- **Notices:** title, date, program, session, file.
- **Contact:** address, phone, WhatsApp, email, office hours *(confirm)*, embedded map, form.
- **Every page:** header, footer, "last updated" date where facts can change.

046. What should appear in the global navigation, footer, account menu, and any role-specific menus?

- **Header:** Home, About, Programs, Admissions, Notices, Contact, and an **Enquire** button.
- **Footer:** address, phone, email, WhatsApp, social links, quick links, privacy policy, affiliation logos.
- **Account menu:** none (no public accounts).
- **Role menus:** staff admin lives at a separate address and never appears in the public menu.

047. What pages or actions must be accessible from the homepage within one or two clicks?

Any program page, fees, admission dates, the enquiry form, WhatsApp, notices and merit lists, the prospectus download, and contact and map.

048. Which pages are public, restricted, hidden, or intended only for direct links?

Type	Pages
Public	All main pages above
Restricted	Staff admin area
Hidden or direct link	Thank-you page, campaign pages, individual notice PDFs; test pages are hidden from search

049. What should users see for missing pages, unavailable content, restricted access, or an empty result set?

- **Missing page (404):** a friendly message with links to Programs, Admissions and Contact.
- **Unavailable content:** "This notice is no longer available — see latest notices".
- **Restricted:** "This area is for RIPS staff" with a link home.
- **Empty list:** "Nothing posted yet" with a contact link.

050. Are there any campaign landing pages, temporary pages, or region-specific pages required at launch?

Temporary: the "coming soon" holding page, needed now. Optional: an "Admissions Open" landing page for ads at launch (could). Region-specific pages: **Not Applicable**.

SECTION G / 8 QUESTIONS

Accounts, Authentication & Permissions

Capture account and access requirements as user-visible product rules.

051. Is account creation required, optional, or unavailable, and for which user types?

User type	Accounts
Public visitors	Unavailable in v1
Staff	Required (created by the administrator)
Students	Unavailable in v1; planned with the phase 3 portal

052. Which sign-up and sign-in methods should be offered (for example, email, phone, or approved social sign-in)?

Staff: email and password, with two-factor sign-in if the admin tool supports it. Visitors and social sign-in: **Not Applicable**. Phone sign-in for students: **Not Decided** (phase 3).

053. What verification, consent, or eligibility steps must occur before an account can be used?

The administrator creates each staff account and the staff member verifies their email. Only named staff are eligible. Visitors only tick the privacy consent box on forms.

054. What account details may users view, edit, download, or remove?

Staff can view and edit their own name, email and password. The administrator can remove accounts. Visitors have no accounts; they ask admissions to correct or delete enquiry data.

055. How should password recovery, locked accounts, sign-out, and account deletion requests work from the user perspective?

- Password reset by emailed link.
- Lock for 15 minutes after 5 failed attempts (proposed); the administrator can unlock.
- Sign-out button, plus automatic sign-out after inactivity.
- Account deletion by the administrator on request.
- Visitors: **Not Applicable**.

056. What roles exist, and which features or pages can each role access?

Role	Access
Visitor	All public pages and forms
Admissions officer	Enquiries, fees, dates, merit lists and notices
Content editor	News, events, notices, gallery, faculty and campus pages
Site administrator	Everything, plus users, settings and backups

057. Who can assign, revoke, or change roles, and what user-facing confirmation is needed?

Only the site administrator, with the approver's agreement for any new administrator. The screen shows "Role changed for [name]", the staff member receives an email, and the change is logged.

058. What should happen if a visitor tries to open a feature or page without the necessary permission?

Staff pages send them to the login page. A visitor opening a restricted address sees "This page is for staff only" with a link to the home page, and no content is revealed.

SECTION H / 10 QUESTIONS

Forms, Files, Content & Data Lifecycle

Specify the information users encounter and contribute to the product.

059. Which forms must exist, and what is the goal of each form?

Form	Goal	Release
Enquiry form	Ask about a program and be contacted	v1
Contact form	General questions	v1
Online application	Apply with documents	Phase 2
Open Day booking	Reserve a campus visit	Phase 2
Staff login	Access the admin area	v1

060. What information must each form collect, and which fields are required versus optional?

Form	Required	Optional
Enquiry	Full name, mobile or WhatsApp number, program of interest, city, consent checkbox	Email, last qualification and marks, message
Contact	Name, phone or email, message	Subject
Application (phase 2)	Name, guardian name, CNIC or B-form number, date of birth, address, results, photo	Extra documents

061. What validation messages, guidance, confirmations, and success states should each form provide?

- Inline, plain-language errors beside each field, e.g. “Enter a valid mobile number”.
- Success: “Thank you, [name]. We received your enquiry and will contact you within 1 working day.”
- Failure: “Something went wrong. Please try again, or WhatsApp us at [number].”
- A short privacy line under the button.
- Spam is blocked silently.

062. Can users save drafts, edit submissions, withdraw requests, or resubmit information?

No drafts. To edit or withdraw an enquiry the user replies to the auto-reply email or contacts admissions. Resubmitting is allowed; admissions removes duplicates.

063. Will users upload images, documents, or videos, and what user-visible file limits or permitted formats are required?

Visitors do not upload files in v1. Phase 2 application (proposed): photo JPG or PNG up to 1 MB; documents PDF, JPG or PNG up to 2 MB each; at most 6 files; with virus scanning. Staff: PDFs up to 5 MB, images compressed to about 1 MB.

064. What content types will be published (such as service pages, articles, FAQs, product listings, or reviews)?

Program pages, admission information, notices, merit lists (PDF), news and event posts, faculty profiles, campus pages, gallery photos, YouTube video embeds, admission FAQs, leadership messages, job openings, and legal pages. Reviews and product listings: **Not Applicable**.

065. Who creates, reviews, approves, publishes, updates, and removes each content type?

Content	Creates	Approves	Publishes, updates, removes
Program pages	Head of department	Principal	Content editor
Fees, dates, merit lists	Admissions officer	Director or Principal	Admissions officer
News, events, gallery	Content editor	Principal	Content editor
About, affiliation, legal	Director	Chairman or Director	Site administrator

066. Which content must be editable without developer involvement, and by whom?

Notices, merit lists, news, events, admission dates, fee tables and PDFs, faculty list, gallery and job openings — by the admissions officer and content editor. Layout changes, new page types, forms and security still need the developer. The editing tool is **Not Decided** (see Q33 of the Vision & Scope answers).

067. What information should users be able to export, download, correct, or request to delete?

Visitors can download any published PDF. They can ask admissions to correct, export or delete their enquiry data by email or WhatsApp; proposed response within 14 days. Staff can export enquiries to Excel or CSV.

068. What user-facing rules apply to records that expire, become outdated, or must be archived?

- Notices move to an Archive after the intake closes (kept about 2 years, proposed).
- Old fee schedules are replaced and the year is shown.
- Merit lists are archived by session.
- News stays dated and is labelled “Archived”.
- Enquiry records are deleted about 12 months after the intake (proposed; confirm).

SECTION I / 7 QUESTIONS

Search, Notifications & Communication

Define how users find content and receive important updates.

069. Does the product require site search, filters, sorting, categories, or recommendations? Which content must they cover?

Site search: could, later. Filters: should have a simple filter on the Programs list (by field and level) and on Notices (program, session, type). Categories: yes (news, notices, events). Recommendations: **Not Applicable**.

070. What search criteria, filter combinations, and sorting options must users have?

- Programs: field (pharmacy, allied health, computing, business), level (undergraduate, postgraduate, short course). Sorted alphabetically.
- Notices: program, session or year, type (admission, merit list, exam, general). Sorted newest first.

071. How should the website respond to zero results, too many results, spelling errors, or unavailable items?

- Zero results: “Nothing found. Try another word or contact admissions”, with links.
- Too many: 10 per page with page numbers.
- Spelling: show the full program list beneath the search box.
- Unavailable items: labelled “Not open this intake” instead of hidden.

072. What notifications or status updates should users receive, and what events should trigger them?

Recipient	Notification	Trigger
Visitor	On-screen thank-you and auto-reply email	Enquiry submitted
Admissions	Email with the enquiry details	Every enquiry
Staff	Security email	Sign-in from a new device (could)
Applicant (phase 2)	Application status	Status change

073. Which communication channels are required (on-site, email, SMS, or another channel)?

On-site messages, email, and WhatsApp click-to-chat started by the user. SMS: **Not Decided** (phase 2 at the earliest).

074. Which messages are mandatory and which can users opt out of or customize?

Mandatory: enquiry confirmation, staff password reset and security emails. Marketing messages or newsletters: **Not Applicable** in v1; if added later they are opt-in with an unsubscribe link. Users cannot customize messages in v1.

075. Do users need support chat, contact forms, messages, comments, or two-way conversations? What outcomes are expected?

A contact form, WhatsApp and phone are enough. No live chat and no public comments (**Not Applicable**). Expected outcome: a reply within 1 working day; WhatsApp answered during office hours *(hours to confirm)*.

SECTION J / 10 QUESTIONS

Transactions, Bookings & External Services

Complete this section only for features relevant to your product.

076. Will the website involve purchases, subscriptions, donations, bookings, reservations, or service requests?

In v1 only **service requests**, in the form of enquiries. Purchases, subscriptions, donations and reservations are **Not Applicable**. Later: application-fee payment and Open Day booking (phase 2 or 3).

077. What must a user choose or supply before confirming each transaction or booking?

Not Applicable in v1. For a later Open Day booking: program, date and time slot, contact details and consent.

078. How are prices, fees, discounts, taxes, availability, and totals shown to users?

Fees are shown as an informational table per program in PKR: tuition per semester or year, admission fee, refundable deposit, other charges, scholarships. Amounts are to be supplied by admissions. Each table says “Fees may change; last updated [date]”. No tax or discount calculator in v1.

079. Which payment or transaction methods and currencies should the user be able to select?

Not Applicable in v1. Admissions may show bank-deposit instructions as plain information **Not Decided**. Later: JazzCash, Easypaisa or bank transfer, in PKR only.

080. What confirmations, receipts, invoices, reference numbers, or status pages must be provided?

v1: on-screen confirmation and an auto-reply email for enquiries. No receipts or invoices. An enquiry reference number is optional (could). Phase 2: application number, receipt and status page.

081. What are the required user-facing rules for cancellation, refunds, failed payments, returns, or rescheduling?

Not Applicable in v1. Before any payment goes live, the Director must approve a published fee-refund policy under institute and regulator rules **Not Decided**.

082. Does the product require third-party services such as maps, payments, email delivery, analytics, CRM, or scheduling?

> Yes: Google Maps, WhatsApp, a form-and-email service, Google Analytics and Search Console, and YouTube embeds, plus links to social pages. Not needed in v1: payments, scheduling. CRM: **Not Decided** (a Google Sheet may serve as a light CRM).

083. For each external service, what outcome does the product depend on, and who owns that relationship?

Service	Outcome needed	Owner
Google Maps	Directions to campus	Institute (developer sets up)
WhatsApp number	Fast chat with admissions	Admissions office
Form and email service	Enquiries delivered	Institute account; developer configures
Google Analytics, Search Console	Measurement and search health	Institute's own Google account
Hosting and DNS (DOMAIN.pk)	Site online	Institute; developer manages
YouTube and social pages	Media and announcements	Institute marketing

084. What should users see or be able to do when an external service is slow, unavailable, or returns an error?

- Map down: address text and an "Open in Maps" link.
- Form service down: message with phone, WhatsApp and email alternatives.
- Video blocked: a plain link to the video.
- WhatsApp not installed: opens WhatsApp Web, or shows the number.
- Analytics down: nothing visible to users.

085. Are manual/offline alternatives required for any transaction or integration failure?

> Yes for enquiries: phone, WhatsApp, email and walk-in at campus, all shown beside the form. The form service also keeps a copy and the admissions officer exports weekly. Payments: **Not Applicable**.

SECTION K / 7 QUESTIONS

Administration, Operations & Moderation

Document the staff workflows needed to operate the website after launch.

086. Which administrator, editor, support, reviewer, or operations roles are needed?

> Site administrator, admissions officer, content editor, and a reviewer role held by the Principal or Director (reads drafts and approves). Support is handled by the admissions desk; no separate role.

087. What everyday tasks must each internal role perform in the website?

Role	Tasks
Admissions officer	Answer and track enquiries, export reports, update fees and dates, publish notices and merit lists
Content editor	Post news, events and photos; update faculty and campus pages
Administrator	Manage users, updates, backups, domain and hosting renewals, uptime and security checks
Reviewer	Check drafts and approve before publishing

088. Which requests, submissions, listings, or accounts require human approval, rejection, escalation, or moderation?

- Fee and date changes: Principal or Director approves.
- Merit lists: Principal approves before publishing.
- Official statements and affiliation or program claims: Director or Chairman.
- Job postings: Director.
- New staff accounts: administrator with Director's agreement.
- Enquiries are not moderated; spam is filtered automatically.

089. What queues, dashboards, worklists, or reports do internal teams need to complete their jobs?

- Enquiry list filtered by status, program and date.
- Draft and scheduled content list.
- Monthly report: enquiries per program and source, visits, top pages.
- Simple setup: Google Sheet plus Analytics views.

090. What statuses should administrators assign, and what do those statuses mean for users?

Item	Statuses (internal unless noted)
Enquiry	New, Contacted, Follow-up, Visited or Applied, Enrolled, Not interested, Spam or duplicate. Users never see these.
Content	Draft, In review, Published, Archived. Users see only Published and Archived.
Program intake	Upcoming, Open, Closing soon, Closed. Shown to users as a badge.

091. Which actions require a reason, second approval, confirmation, or visible activity history?

- Fee changes: second approval and a note.
- Merit list publishing: approver's confirmation.
- Deleting content or enquiries: confirmation, and a reason for enquiries.
- Role changes: administrator re-enters password and the change is logged.
- Activity history (who, what, when) is internal; public pages show "Last updated".

092. What are the expected support and exception-handling processes when something goes wrong?

- Users: phone, WhatsApp or email admissions.
- Staff report site problems to the developer by WhatsApp or email; normal issues within 3 working days, site down or hacked the same day (proposed).
- Incident: switch to the holding page, restore from backup, tell the Director, and write a short incident note.
- Backups are restore-tested before launch.

SECTION L / 9 QUESTIONS

UX, Devices, Accessibility & Localization

Define experience standards that affect product behavior, not pixel-level implementation.

093. Which device types and screen sizes are essential for the intended audience?

Android phones first, then iPhones, tablets and laptops or desktops. Test at widths of 360, 390, 768, 1366 and 1920 px.

094. Which browsers and operating systems must be supported at launch?

Chrome, Edge, Firefox, Safari (iOS) and Samsung Internet, latest two versions. Windows 10 and 11, Android 8 and later, iOS 15 and later. Internet Explorer is not supported.

095. Are there important low-bandwidth, older-device, or intermittent-connectivity user scenarios?

> Yes: mobile data, older Android phones and patchy connections. Pages stay about 1.5 MB or less, images are compressed and lazy-loaded, no autoplay video, content works with light scripting, and PDF links show file size.

096. Which accessibility expectations apply (for example, keyboard access, readable contrast, captions, or screen-reader support)?

- WCAG 2.1 AA basics.
- Keyboard navigation with visible focus.
- Text contrast of at least 4.5:1; text can be enlarged to 200%.
- Alt text on images and labelled form fields.
- Proper headings for screen readers.
- Captions on videos where possible.

097. Which languages are required, and must the interface support right-to-left text?

> English is required in v1. Urdu for key pages (program summaries, admission steps, contact) is a could-have for v1, otherwise phase 2. Right-to-left layout and a proper Urdu font are required wherever Urdu appears.

098. Must users be able to change language, and should that preference persist?

> Yes, once Urdu exists: an EN | اردو switch in the header, remembered on the user's device. **Not Applicable** until then.

099. What level of onboarding, guidance, help text, or contextual assistance do new users need?

> Minimal. Clear labels, a "How to apply" steps block, short help text under form fields, and an admissions FAQ. No tutorials. Staff get a one-page guide and a short handover session.

100. Which experiences need to work especially quickly or with unusually few steps?

- Enquiry: one page, six main fields, under 60 seconds.
- WhatsApp or call: one tap.
- Fees: two clicks from the home page.
- Latest notice: top of the list, one click to the PDF.

101. Are there any non-negotiable brand, tone-of-voice, trust, or experience principles?

- **Trust first:** real photos and names, affiliation shown, no template filler, no invented statistics.
- **Clarity:** plain language, no jargon.
- **Honesty:** only verified facts, with "last updated" dates.
- **Respect:** modest imagery that suits local norms; no pop-up spam or dark patterns.
- **Tone:** professional, warm, concise; one official institute name everywhere.

SECTION M / 9 QUESTIONS

Privacy, Trust, Security & Quality Expectations

Identify user and organizational expectations; implementation detail belongs in the SRS and architecture.

102. What personal, confidential, sensitive, or payment-related information will the website handle?

> v1: name, phone, email, city and qualification marks from enquiries, plus staff login credentials. Phase 2 applications add sensitive data: CNIC or B-form number, date of birth, address, photo and academic documents. Payment information: none in v1.

103. What privacy disclosures and user consent choices must be shown, and when?

A privacy policy linked in the footer and beside every form. A required consent checkbox on forms ("I agree to be contacted"). A short cookie or analytics notice if non-essential cookies are used. The policy states what is collected, why, who sees it, how long it is kept and how to request deletion.

104. What user rights or requests must the product support (such as consent withdrawal, correction, export, or deletion)?

Consent withdrawal (stop contacting me), correction, export and deletion, by email or WhatsApp to admissions, handled within about 14 days (proposed). Whether a Pakistani data-protection law applies is **Not Decided**; confirm with legal counsel.

105. Are any legal, industry, geographic, or contractual rules mandatory for launch?

- Advertise only programs that have valid affiliation and approval, and show the letters (affiliating university, Higher Education Commission, and the pharmacy, nursing or physiotherapy councils as applicable) *(confirm each)*.
- Use the institute's registered name; "University" is normally reserved for chartered institutions.
- Pakistan's electronic-crimes law applies to published content.
- Use only images and text the institute owns or licenses.

106. What safeguards must users experience for important or high-risk actions (for example, reauthentication or confirmation)?

- Staff login: strong password, two-factor sign-in if available, timeout.
- Changing fees or merit lists: confirmation and approval.
- Deleting content or enquiries: confirmation.
- Role changes: password re-entry.
- Visitors have no high-risk actions in v1; a phase 2 application needs a review screen, a confirm step and an email receipt.

107. What availability, loading-speed, and general reliability expectations must the product meet?

- Availability at least 99.5% a month (proposed).
- Pages load in under 3 s on 4G; Largest Contentful Paint 2.5 s or better.
- Mobile Lighthouse performance score of 85 or higher.
- Form delivery success of 98% or better.
- Daily backups kept 14 days; restore within 4 hours.

108. What happens to the user experience during planned maintenance, service interruptions, or temporary outages?

Planned work is done late at night and announced by a banner 48 hours before. During an outage a simple "We'll be back shortly" page shows phone and WhatsApp details; static pages stay cached where possible; updates are posted on Facebook.

109. What auditability, complaint resolution, dispute handling, or incident notification behavior is required?

Staff changes are logged (who, what, when). A "Report a problem" link goes to admissions; complaints are acknowledged in 2 working days and reviewed by the Director. If personal data is exposed, the Director is told at once and affected people and any regulator are notified as the law requires.

110. Are there specific trust and safety risks such as abuse, spam, fraud, impersonation, or harmful content that the product must address?

- Form spam and bots: CAPTCHA or hidden-field check and rate limiting.
- Fake sites or fake admission offers impersonating RIPS: publish official contacts, bank details and a notice that RIPS never asks for fees into personal accounts (should).
- Defacement and malware, which has already happened: HTTPS, security headers, two-factor on domain, hosting and email, uptime and Search Console monitoring.
- Harmful user content: **Not Applicable** (no comments or uploads).

SECTION N / 8 QUESTIONS

Measurement, SEO & Product Learning

Decide what to track so decisions can be made using evidence.

111. Which user events or funnel steps must be measured (for example, visits, searches, sign-ups, starts, completions, or drop-offs)?

- Page views and program page views
- Clicks on Enquire, WhatsApp, call and map
- Form started, submitted, and errors
- Prospectus and PDF downloads
- Notice and merit list views
- Social link clicks

112. Which five product metrics should stakeholders review regularly?

1. Enquiries per week (form, WhatsApp, calls)
2. Visit-to-enquiry conversion rate
3. Enquiry-to-enrolment rate (from admissions records)
4. Organic search visits and impressions for admission keywords
5. Page speed and uptime

113. How should success metrics be segmented (by device, traffic source, region, user type, or another dimension)?

By device (mobile or desktop), traffic source (Google, Facebook, WhatsApp, direct), city or region, program, language, and new versus returning visitors.

114. Who needs access to dashboards or reports, and how frequently should they review them?

Who	What	How often
Admissions officer and Director	Enquiry and traffic dashboard	Weekly in admission season, otherwise monthly
Chairman	Short summary	Quarterly
Principal	Program interest report	Each intake
Developer	Speed, errors, uptime	Weekly

115. Which pages and content types need organic search visibility or indexing?

Index: Home, every Program page, Admissions, About, Faculty names, recent News, Campus and Contact. Do not index: thank-you page, admin, test pages and **merit-list PDFs** (they contain student names).

116. Are there product requirements for social sharing, referral links, campaigns, or conversion tracking?

Yes. Link previews (title and image) for Facebook and WhatsApp on programs and news; UTM-tagged links and QR codes for posters and ads; and conversion events for form submits and WhatsApp clicks.

117. How will users submit feedback, report problems, or suggest features after launch?

A “Report a problem or suggest” link in the footer that emails the administrator. Admissions also forwards feedback from calls and visits. Reviewed monthly.

118. What evidence or thresholds should trigger improvements, experiments, or a change in priorities?

- Visit-to-enquiry conversion under the target for 30 days.
- Mobile bounce rate over 70% on program pages.
- Page load over 3 s.
- Form errors of 2% or more.
- More than 10 repeat calls about the same missing information, so add an FAQ.
- Candidates to test: button wording and form length.

SECTION O / 11 QUESTIONS

Delivery, Acceptance & Release Planning

Specify what makes the product complete and how it enters service.

119. What is the target launch date, and is it fixed or flexible?

Not Decided. Proposed: before the next admissions intake opens *(confirm date)*. The date is flexible for features but **fixed for the safety fix**: the holding page should go live immediately.

120. What budget, team, time, content, or vendor constraints affect product scope?

- Budget **Not Decided**; development is in-house by one developer.
- Content depends on departments.
- No payment gateway or CMS purchase planned.
- Host choice pending.
- Admission-season time pressure.

121. Which decisions, approvals, content, licenses, domain assets, or third-party accounts must be ready before development or launch?

- Written approval of the PVS and this PRD
- Approved program list, fees, dates and eligibility
- Affiliation and approval documents
- High-resolution logo and real photos
- Leadership messages
- Privacy policy text
- New hosting account and DNS access at DOMAIN.pk
- WhatsApp number and admissions email
- Institute-owned Google account for Analytics and Search Console
- Form-service account
- Licensed fonts and images

122. What release phases are planned (internal prototype, closed beta, public beta, full launch, or other)?

1. **Phase 0 – Holding page** (now).
2. **Phase 1 – Internal prototype** on a password-protected staging copy.
3. **Phase 2 – Closed review** by the Director, Principal and admissions.
4. **Phase 3 – Full public launch v1.0.**
5. **Phase 4 – v1.1**: online application, Urdu, Open Day booking.

No public beta.

123. Who will test the product from the perspective of each important persona?

Persona	Tester
Prospective student	A few newly admitted students on Android phones
Parent	Two or three staff or parents
Admissions officer	The admissions officer (enquiry flow and updates)
Content editor	The content editor (post a notice)
Content accuracy	Director and Principal
Technical and security	Developer

124. What acceptance conditions must be satisfied for each must-have user journey?

Journey	Acceptance conditions
1 Find program and enquire	Program page reachable in 3 clicks or fewer; form submits in under 60 s on a 360 px phone; success message shown; admissions email within 1 minute; auto-reply received
2 Admission info	Dates, fees and documents shown; all PDFs download; no placeholder text
3 Notices	Staff-published notice appears within 5 minutes, newest first; PDF opens; no broken links

125. What critical issues would prevent launch, and which minor issues may be deferred?

Blocks launch	May be deferred
Any security warning or malware; form not delivering; wrong fees, dates or affiliation; broken mobile layout; certificate error; missing privacy policy; placeholder text; email (MX) broken; staff cannot update notices	Minor styling; extra gallery photos; Urdu pages; Careers page; small animations; minor SEO tuning

126. What training, handover materials, and operational readiness are required before launch?

- One-hour session for the admissions officer and content editor, with a one-page how-to.
- Handover pack: code repository, credentials in an institute-owned password manager, domain and hosting access given to named owners, backup and restore steps, contact list.
- Readiness: monitoring on, restore test passed, support contact named, roles assigned.

127. What legal pages, support information, contact details, and launch communications must be in place?

- Privacy policy and a short terms or disclaimer page.
- Address, phone, WhatsApp, email and office hours *(old test site mentions Damoana Road, Sheikhupura; confirm)*.
- Affiliation and approval pages.
- Launch posts on Facebook, Instagram, YouTube and WhatsApp.
- Update Google Business Profile, submit the sitemap, redirect old addresses, brief staff.

128. Who gives final launch approval, and what evidence must they review?

The approver named in Q3 (Chairman or Director, **Not Decided**). Evidence: staging walkthrough, completed acceptance checklist (Q124), security-scan result, speed report, content sign-offs, form-delivery test, backup restore test, and DNS and email check.

129. What is the plan for monitoring, responding to issues, collecting feedback, and prioritizing improvements during the first 30 days?

> - **Days 1–7:** daily checks of uptime, form delivery, Search Console and errors; fix problems within 24 hours.
> - **Weekly:** 20-minute review with Director, admissions and developer; report enquiries, visits and issues.
> - **Feedback:** admissions notes plus the footer link.
> - **Prioritize:** rank the backlog Must, Should, Could using the numbers.
> - **Day 30:** decide what goes into phase 2.

FEATURE REQUIREMENT WORKSHEETS

Core features

One worksheet per core Section E feature. Phase 2 features (online application, Urdu, Open Day booking) will get worksheets when they are scheduled.

FEAT-001: Program index and program pages

F01 Feature ID and name	**FEAT-001** — Program index and program pages
F02 User / persona	Prospective student, parent
F03 Problem and intended outcome	Cannot find what each program offers. After: user understands duration, eligibility, fee and affiliation and can enquire.
F04 Trigger and entry point	Google search, Programs menu, home page program cards, shared link
F05 Preconditions	Program is on the approved list; affiliation or approval confirmed; fee and eligibility supplied
F06 Primary user flow	Open Programs → pick a program → read page → tap Enquire or download details
F07 Inputs and visible information	Nothing entered. Visible: name, level, duration, eligibility, fee, affiliation, outline, careers, head of department
F08 Business rules	Only approved programs shown; “last updated” date shown; closed intakes labelled
F09 Successful outcome	Page loads in under 3 s and shows every field above; Enquire button is visible without scrolling on a phone
F10 Errors and alternate paths	Unknown program address shows the 404 page with links; program not open shows “Not open this intake”
F11 Permissions and privacy	Public. No personal data collected on the page
F12 Notifications and dependencies	Depends on content approval and the Enquiry form (FEAT-003)
F13 Priority and release	Must, v1.0
F14 Acceptance criteria	Every approved program has a page; no placeholder text; mobile layout checked at 360 px; Enquire works from every page
F15 Open questions and decision owner	Exact degree titles and affiliation wording (Principal); final program list (Director)

FEAT-002: Admissions information and fee structure

F01 Feature ID and name	**FEAT-002** — Admissions information and fee structure
F02 User / persona	Prospective student, parent
F03 Problem and intended outcome	Unclear fees, dates and steps. After: user knows what to submit, when, and what it costs.
F04 Trigger and entry point	Admissions menu, home page dates strip, poster QR code
F05 Preconditions	Admissions office has approved current dates, fees, documents list and scholarship rules
F06 Primary user flow	Open Admissions → read steps and dates → download prospectus and fee PDF → enquire
F07 Inputs and visible information	Nothing entered. Visible: steps, documents needed, dates, fee table per program (PKR), scholarships, prospectus link
F08 Business rules	Fees and dates published only after Principal or Director approval; every table shows a last-updated date; scholarship claims only if confirmed
F09 Successful outcome	User sees current-intake information and the PDF downloads
F10 Errors and alternate paths	Intake closed: page says so and shows the next expected intake; PDF missing: link hidden and contact details shown
F11 Permissions and privacy	Public. Staff with admissions role can edit
F12 Notifications and dependencies	Depends on staff content updates (FEAT-006)
F13 Priority and release	Must, v1.0
F14 Acceptance criteria	Dates, fees and documents match the approved sheet; PDFs open; changes show live within 5 minutes
F15 Open questions and decision owner	Fee amounts, scholarship rules, intake dates (Admissions and Director)

FEAT-003: Enquiry form

F01 Feature ID and name	**FEAT-003** — Enquiry form
F02 User / persona	Prospective student, parent
F03 Problem and intended outcome	Hard to enquire outside office hours. After: admissions has the person's details and follows up within 1 working day.
F04 Trigger and entry point	Enquire button in header and on program pages, Contact page
F05 Preconditions	Form service and admissions mailbox set up; privacy policy published
F06 Primary user flow	Tap Enquire → fill fields → tick consent → Submit → see thank-you and receive auto-reply
F07 Inputs and visible information	Required: name, mobile or WhatsApp number, program, city, consent. Optional: email, qualification and marks, message
F08 Business rules	Valid Pakistani mobile format; consent required; limit of 5 submissions per hour per device (proposed); spam check
F09 Successful outcome	Thank-you message, auto-reply email (if email given), admissions email within 1 minute, entry saved to the enquiry sheet
F10 Errors and alternate paths	Invalid field: inline message. Service down: message with phone, WhatsApp and email. Spam: blocked silently
F11 Permissions and privacy	Public to submit. Only admissions staff see entries. Privacy notice and consent on the form
F12 Notifications and dependencies	Email to admissions; auto-reply to user; depends on the form service and privacy policy
F13 Priority and release	Must, v1.0
F14 Acceptance criteria	Test submissions reach admissions every time; works on a 360 px Android phone; errors are readable; spam test blocked
F15 Open questions and decision owner	Which form service; retention period (Director); admissions mailbox address (Admissions)

FEAT-004: Notices and merit lists

F01 Feature ID and name	**FEAT-004** — Notices and merit lists
F02 User / persona	Current student, applicant; staff publish
F03 Problem and intended outcome	Updates are scattered across social media. After: one official, dated list.
F04 Trigger and entry point	Notices menu, home page notices strip, links shared on social media
F05 Preconditions	A notice or merit list is approved and exported as PDF
F06 Primary user flow	Open Notices → filter by program or type → open the PDF
F07 Inputs and visible information	Visible: title, date posted, program, session, type, file size. Staff enter all of these and upload the PDF
F08 Business rules	Merit lists published by the admissions officer after Principal approval; notices archived after the intake closes; merit-list PDFs hidden from search engines
F09 Successful outcome	Newest notice at the top; PDF opens
F10 Errors and alternate paths	No notices: “Nothing posted yet”. Removed file: “This notice is no longer available”
F11 Permissions and privacy	Public to read. Admissions officer and content editor can add or edit. Merit lists contain names, so they are kept out of search results
F12 Notifications and dependencies	Depends on a staff update method (FEAT-006). SMS or WhatsApp alerts are a later idea
F13 Priority and release	Must, v1.0
F14 Acceptance criteria	A test notice published by staff appears within 5 minutes; archive works; filters work; no broken links
F15 Open questions and decision owner	Archive length (Director); who approves each notice type (Principal)

FEAT-005: WhatsApp, call and contact page

F01 Feature ID and name	**FEAT-005** — WhatsApp, call and contact page
F02 User / persona	Prospective student, parent, current student
F03 Problem and intended outcome	Wants a fast, familiar way to talk to admissions. After: one tap opens a chat or call.
F04 Trigger and entry point	Floating WhatsApp button, header call button, Contact page, footer
F05 Preconditions	A staffed WhatsApp number, phone number and verified address exist
F06 Primary user flow	Tap WhatsApp → chat opens with a pre-filled message → admissions replies
F07 Inputs and visible information	Visible: address, phone, WhatsApp, email, office hours, map. The message is pre-filled and can be edited
F08 Business rules	Details shown only if staffed and confirmed; office hours stated
F09 Successful outcome	The chat or dialer opens; the map shows the campus
F10 Errors and alternate paths	WhatsApp not installed: opens WhatsApp Web or shows the number. Map down: address text and a map link
F11 Permissions and privacy	Public. No data stored on the website; WhatsApp's own terms apply
F12 Notifications and dependencies	Depends on WhatsApp and Google Maps
F13 Priority and release	Must, v1.0
F14 Acceptance criteria	Link opens the right number on Android and iPhone; map shows the correct location; call button dials
F15 Open questions and decision owner	Which number and office hours (Admissions); verified address (Director)

FEAT-006: Staff content updates (light admin)

F01 Feature ID and name	**FEAT-006** — Staff content updates (light admin)
F02 User / persona	Admissions officer, content editor, administrator
F03 Problem and intended outcome	Every change needs a developer. After: staff update notices, dates, fees and news themselves.
F04 Trigger and entry point	Staff open the admin address and sign in
F05 Preconditions	Staff accounts created; update method chosen; a one-page guide exists
F06 Primary user flow	Sign in → choose item (notice, date, fee, news) → edit or upload → preview → publish
F07 Inputs and visible information	Staff enter text, dates, PDFs and photos; they see a preview and enquiries (admissions only)
F08 Business rules	Role-based access; fee, date and merit-list changes need approval; every change is logged
F09 Successful outcome	Change visible on the live site within about 5 minutes; staff see a “Published” message
F10 Errors and alternate paths	Wrong password: message and lockout after 5 tries. File too big or wrong type: clear message. Mistake: roll back to the previous version
F11 Permissions and privacy	Staff only; strong password and two-factor sign-in if available; admin area hidden from search
F12 Notifications and dependencies	Security emails; depends on the tool decision (Git-based editor, or form data to email and a Google Sheet)
F13 Priority and release	Should, v1.0 (if not ready, the developer updates content on request and this moves to v1.1)
F14 Acceptance criteria	A trained staff member publishes a notice and edits a date unaided; a wrong edit is reversed; unauthorized access is blocked
F15 Open questions and decision owner	Which admin tool (Director and developer); who gets which role (Director)

Approval and completion check

☐ All must-have features have clear owners, users, expected outcomes, and acceptance criteria.
☐ All significant user journeys include success, error, cancellation, and permission paths.
☐ Every unresolved item is explicitly marked Not Decided with a decision owner.
☐ PRD priorities are consistent with the approved Vision & Scope document.
☐ Product owner and required stakeholders have reviewed and approved this PRD input.

> **Status of these boxes:** left unticked on purpose. The answers are a draft; ticking them is the approver's decision.

Product owner / approver: _____ *(Not Decided; see Q3)*

Date: _____
