WEBSITE DEVELOPMENT / DOCUMENT 04 — ANSWERS

User Workflows & Use Cases

Completed questionnaire: who does what, step by step, and what counts as success

PROJECT / WEBSITE	Radiant Institute of Professional Studies (RIPS), Sheikhupura — rips.edu.pk
PREPARED BY	Sarosh (website developer)
DATE / VERSION	17 October 2026 / v1.0 draft answers — for review
COVERAGE	39 questions · 8 sections · 3 workflow maps (J1, J5, J6) · 3 use case records (UC-01 to UC-03)
INPUTS	Doc 01 PVS answers (draft v0.1) · Doc 02 PRD answers (draft v1.0) · Doc 03 SRS answers (draft v1.0)

How to read this. References use the earlier documents' IDs: **PVS Q**n (Doc 01), **PRD Q**n (Doc 02), SRS IDs such as **B-01**, features **FEAT-001…006** and open decisions **OD-01…18** (Doc 03). **Not Decided** names its owner. **Not Applicable** gives a reason. *(proposed)* marks a recommendation the approver must confirm.

CONTENTS

Sections and worksheets

A	Inputs, boundaries & priority	5 questions
B	Actors, roles & access	5 questions
C	Happy paths & handoffs	6 questions
D	Alternatives, errors & recovery	5 questions
E	Communication & lifecycle	5 questions
F	Inclusive & safe operation	5 questions
G	Verification & traceability	5 questions
H	Completion decisions	3 questions
W	Workflow maps: J1 enquiry, J5 publish notice or merit list, J6 handle enquiry	
W	Use case records: UC-01 submit enquiry, UC-02 publish merit list, UC-03 delete data on request	

A. Inputs, boundaries & priority

01. Which approved goals, features and rules in Documents 01–03 does each proposed journey implement? Cite their IDs or pages.

ID	Journey	Actor	Priority	Implements
J1	Find a program and send an enquiry	Visitor	Must	PVS Q15, Q32 · PRD Q23 · FEAT-001, FEAT-003
J2	Check admission steps, dates and fees; download prospectus	Visitor	Must	PRD Q23 · FEAT-002
J3	Find a notice or merit list	Current student, applicant	Must	PRD Q23 · FEAT-004
J4	Contact admissions by WhatsApp, call or directions	Visitor	Must	PRD Q10 · FEAT-005
J5	Publish a notice or merit list	Admissions officer (editor: general notices)	Must	SRS L-04 · FEAT-004, FEAT-006
J6	Handle an enquiry from New to Enrolled	Admissions officer	Must	SRS G-02, G-03 · FEAT-006
J7	Update fees or intake dates with approval	Admissions officer + approver	Must	SRS E-11, L-04 · FEAT-002
J8	Correct or delete a visitor's data on request	Visitor → admissions	Must (manual + staff tool)	SRS M-04, M-06
J9	Staff sign-in, password reset, account management	Staff, administrator	Must	SRS C-04 to C-11
J10	Post news or an event	Content editor	Should	PRD Q34
J11–J13	Online application · Open Day booking · switch to Urdu	Visitor	Later (phase 2)	PRD Q30, Q60 · SRS B-02

02. Which journeys must work in the first release, and which can wait? What evidence supports that order?

Release 1: J1–J9 (Must), J10 (Should). **Later:** J11–J13.

Evidence: the PVS primary objective is admission enquiries (PVS Q15) and the top PRD problems are the unsafe site, missing program and fee information, and scattered notices (PRD Q8). J1–J4 serve those directly; J5–J9 are what staff need to keep them true. Phase 2 items are explicitly out of scope (SRS B-02). Real usage evidence is still missing: baselines are **Not Decided** — owner: admissions officer (OD-13).

03. Where does each journey begin and end from the user's point of view?

Journey	Begins	Ends
J1	Google result, social post, shared link or Home	Thank-you page and auto-reply email; later a call from admissions
J2	Admissions menu or poster QR code	PDF opened, or enquiry/WhatsApp started
J3	Notices menu, Home notices strip or shared link	Merit-list PDF opened
J4	WhatsApp/call button on any page; Contact page	Chat or call open; Maps showing campus
J5	Staff signs in, Notices › Add	Notice live on public list within 5 minutes
J6	Email alert of a new enquiry	Enquiry status Enrolled or Not interested
J7	Approved fee sheet or dates received	Updated page live; previous version kept
J8	Visitor's email or WhatsApp request	Data corrected or deleted; visitor told within 14 days (proposed)
J9	Invitation email or Forgot password link	Staff signed in to their landing page
J10	Staff signs in, News › Add	Post live

04. Which journeys depend on content, policy, payment, approval or an external service being ready?

Journey	Depends on
J1	Approved program list and fees (OD-07), affiliation wording (OD-08), form service (OD-06), admissions mailbox (OD-04), privacy policy
J2	Approved dates and fees, prospectus PDF
J3, J5	Admin tool (OD-05); Principal's approval for merit lists
J4	WhatsApp number and office hours (OD-14); verified address
J6	Enquiry store and status tool (OD-05, OD-06)
J7	Approver named (OD-01)
J8	Retention rules and legal review (OD-10, OD-15)
J9	Admin tool with two-factor support (OD-05), email (OD-04)
All	Hosting (OD-03) and DNS access at DOMAIN.pk. No journey depends on payment.

05. Which open decisions or contradictions in Documents 01–03 could change a journey? Who owns each decision?

Decision	Effect on journeys	Owner
OD-05 Admin tool	Shapes J5–J7, J9, J10 screens; per-type permissions (merit lists) may need process control	Developer, approved by Director
OD-06 Form service	Where J1 stores enquiries and how J6 tracks statuses	Developer
OD-11 Urdu in release 1	Adds J13 language switch	Director
OD-01 Approver	Who confirms in J5 and J7	Chairman
OD-18 Bank details	Whether J2 shows deposit details	Director, admissions

One wording difference noted, not a conflict: PRD Q33 kept the admin panel "light", while SRS L-01 lists dashboards and an activity log. Both stand: SRS L-01 describes what is needed, and OD-05 decides how much of it a tool provides in release 1.

B. Actors, roles & access

06. Who initiates each journey: visitor, signed-in customer, content editor, staff member, administrator or another actor?

Visitor: J1–J4, J8 (by message). Admissions officer: J5, J6, J7. Content editor: J5 (general notices only), J10. Administrator: J9 and any journey as backup. Signed-in customer: **Not Applicable** — no visitor accounts (SRS C-04).

07. Can one person hold several roles? If so, which role is active during each journey and how do they switch?

Yes (SRS C-03). Permissions are the union of roles, so there is no switching: a person who is both admissions officer and content editor sees both sets of menus. The activity log records the person, not the role.

08. Which actions and information can each role view, create, change, approve, export or delete?

As SRS C-02. Summary: visitors view public content and create enquiries; admissions officer manages enquiries, fees, dates, notices and merit lists; content editor manages news, events, programs text and general notices; administrator does everything plus users. Approval of fees, dates and merit lists is by the Principal or Director, recorded by the publisher (SRS L-04).

09. Where must a visitor sign in, verify identity or gain permission before continuing?

Visitors never sign in. The only gates are the consent tick on forms (J1) and, for J8, identity confirmation by admissions before changing data: the request must come from the same phone or email as the enquiry, or the person is called back on that number. Staff sign in with password and two-factor (J9).

10. What should happen when a session expires, an account is disabled or a user lacks permission midway through a task?

- Session expires (30 min idle): “Your session has ended. Please sign in again.” After sign-in, the user returns to the same screen; unsaved text is restored where the tool allows (SRS E-10).
- Account disabled midway: the next action signs the user out with “This account is not active. Please contact the site administrator.”
- No permission (e.g. content editor tries a merit list): “Only admissions can publish merit lists.” Nothing is saved.

C. Happy paths & handoffs

11. For each priority journey, what event starts it and what information must already exist?

Journey	Start event	Must already exist
J1	Visitor taps Enquire	Published program list; form service; privacy policy
J2	Visitor opens Admissions	Current dates, fees, documents list, prospectus PDF
J3	Visitor opens Notices	At least one published notice (else empty state)
J5	Merit list approved	Final PDF, program, session, approver’s name
J6	Enquiry email arrives	Enquiry record with status New
J7	Approved fee sheet received	Approver’s written or WhatsApp approval

12. What are the user’s steps in order, including the page or screen used at each step?

J1: Home or Program page → tap Enquire → Enquiry form → Submit → Thank-you page.

J2: Admissions → Fee structure → tap PDF link → PDF opens.

J3: Notices → choose filter → tap notice → PDF opens.

J5: Staff sign-in → Notices list → Add notice → fill fields and upload → Preview → Publish → confirm.

J6: Email link → Enquiry detail → call or WhatsApp → set status and note → Save; repeat until closed.

J7: Staff sign-in → Admissions or Fees editor → edit → enter approver → Save → confirm → Publish.

Full step tables are in the workflow maps and use case records at the end.

13. What must the website show or do after each meaningful action?

Action	Website response
Leaves a form field	Checks it; shows a message beside it if wrong
Submit enquiry	Button disabled, “Sending…”; then Thank-you page; emails sent
Choose a filter	List updates in under 1 s; address updates
Upload a PDF	File checked; preview shown
Publish	Confirmation dialog; then “Published” and the public page updates within 5 minutes
Change enquiry status	“Saved”; history line added with name and time

14. Which steps require a decision, review, confirmation or handoff to another person or system?

- J1: handoff to the form service, then to admissions by email (system), then to a person (call-back).
- J4: handoff to WhatsApp or the phone dialer.
- J5 and J7: review by the Principal or Director before publishing; confirmation dialog.
- J6: admissions decides the next status.
- J8: admissions confirms identity, then deletes.

15. What information does the user enter, upload or select, and where does it come from?

J1: name, mobile, program, city, consent (required); email, qualification, marks, message (optional) — from the visitor (SRS F-02). J5: title, type, program, session, dates, PDF — from the admissions office's approved file. J6: status and notes — from the call. J7: fees and dates — from the approved fee sheet. Visitors upload nothing in release 1.

16. What is the clear success state, including any receipt, next step or status the user should see?

J1: Thank-you page saying admissions will call within 1 working day, with office hours and a WhatsApp link; auto-reply email if an email was given. No reference number in release 1 (PRD Q80). J5/J7: "Published" message and the live page. J6: status shown in the list. J8: a reply from admissions confirming the change.

D. Alternatives, errors & recovery

17. What alternate route is available if a user skips an optional step or changes a choice?

- J1: optional fields can be left empty; program can be "Not sure yet"; visitor can switch to WhatsApp at any point.
- J3: visitor can clear filters or browse the Archive.
- J5: save as Draft instead of publishing; replace an existing merit list.
- J6: skip straight from New to Not interested or Spam/Duplicate.

18. What should happen if required information is missing, invalid or duplicated?

Field messages from SRS F-07; the form is not sent and focus moves to the first error. A repeat enquiry from the same phone for the same program within 7 days is accepted and flagged Possible duplicate (SRS F-05). A second merit list for the same program and session asks Replace or Cancel.

19. Can a user save progress, return later, go back or cancel? What is retained or removed in each case?

Who	Save	Back / cancel	Retained
Visitor (J1)	No	Back leaves the form	Nothing stored until Submit
Staff (J5, J7, J10)	Draft	Cancel discards unsaved edits after a warning	Drafts stay until published or deleted
Admissions (J6)	Each status change saves	Status can be changed back (except from Enrolled)	Full history kept

20. How should the journey behave if the network fails, an upload times out or an external service responds late?

> Enquiry: after 15 s show “We couldn’t send your enquiry. Please try again, or WhatsApp us at [number]”, keeping typed values. Staff upload timeout: “Upload failed — please try again”; nothing published. Map, video or analytics late: page works without them (SRS J-05).

21. What happens if the same action is submitted twice or two people edit the same item?

> Double submit: one-time token, so only one enquiry is stored (SRS Q-03). Two staff editing: the second to save is warned and must review the other’s change (SRS G-07). Two staff changing an enquiry status: latest wins; both appear in history.

E. Communication & lifecycle

22. Which events change an item’s status, and who is allowed to make each change?

> Enquiry: New → Contacted → Follow-up → Visited/Applied → Enrolled, or → Not interested / Spam-Duplicate, by admissions officer or administrator. Content: Draft → In review → Published → Archived, by the role owner; Archive also happens automatically on the archive date. Intake status changes automatically by date. Full rules in SRS G-02 to G-04.

23. What notifications or reminders are needed, for whom, through which channel and with what opt-out or preference?

Notification	To	Channel	Opt-out
New enquiry	Admissions	Email (within 1 min)	No
Enquiry auto-reply	Visitor	Email, if given	No marketing follows; can ask not to be contacted
Enquiry still New after 1 working day (Could)	Admissions	Email	Admissions can turn off
Daily summary (Could)	Admissions	Email 9:00 am	Yes
Account and security	Staff member	Email	No
Failures	Administrator	Email / monitor app	No

24. What can a user see while a request is pending, rejected, completed or reopened?

> Visitors have no status page in release 1: after the Thank-you page, progress is communicated by admissions by phone or WhatsApp. Staff see each enquiry’s status and history. Content shows Draft / In review / Published / Archived in the staff list.

25. When and how can a user correct, withdraw, appeal or resubmit information?

> Visitors: by replying to the auto-reply or messaging admissions, any time; admissions updates the record or deletes it (J8). Resubmitting the form is allowed. Merit-list objections go to admissions in person or by phone under the institute’s existing process; the website only republishes a corrected PDF. Appeals beyond that: **Not Applicable** (no online decisions are made).

26. What audit history, reference number or confirmation does each role need to understand what happened?

> Visitor: Thank-you page and auto-reply. Admissions: enquiry history (status, note, who, when). Publishers and Director: content history with publisher, approver and time; activity log for sign-ins, exports and deletions (SRS L-10, R-02). Enquiry reference number: Could (PRD Q80).

F. Inclusive & safe operation

27. Can every step be completed with a keyboard, screen reader and clear focus order? Where could this fail?

> Yes for all public journeys (SRS N-04, N-05). Risk points to test: the mobile menu drawer (focus trap and Esc), filter controls on Notices, the CAPTCHA widget (choose an accessible one or an invisible check), the WhatsApp floating button (needs a text label), embedded maps (provide a text address and link), and the third-party staff editor (check before choosing, OD-05).

28. What plain-language help, validation and recovery text is needed for unfamiliar users?

> - One line above the form: “Takes under a minute. We’ll call you back within 1 working day.”
> - Phone example “0300 1234567” as hint text.
> - Why we ask: “We use your number only to answer your enquiry.”
> - Validation messages from SRS F-07.
> - Every failure message offers WhatsApp and phone.
> - Admissions page “How to apply” in numbered steps; an FAQ for common questions.

29. Which steps may expose private or sensitive information, and who must be prevented from seeing it?

> Enquiry emails and the enquiry list (only admissions and administrator); exports (logged, confirmed); merit lists containing names (public by institute decision but kept out of search engines); auto-replies must not repeat phone numbers or marks; analytics must never receive form values (SRS R-08). Content editors must not see enquiries.

30. What happens when users have slow connections, small screens, interrupted sessions or assistive technology?

> Pages stay under about 1.5 MB with text first and lazy images (SRS P-11); all journeys work at 360 px and 200% zoom (SRS N-06); interrupted form submissions keep values and allow retry; staff sessions restore after sign-in where possible; screen-reader and keyboard support per Q27.

31. Are there fraud, abuse or mistaken-action risks that require confirmation, limits or human review?

> - Spam enquiries: CAPTCHA or hidden-field check, 5 per hour per device (SRS O-03).
> - Wrong merit list or fee published: confirmation naming program and session, plus recorded approver.
> - Mass export of personal data: confirmation and logging.
> - Fake RIPS sites or fee scams: warning text that RIPS never asks for fees into personal accounts (SRS O-12).
> - Accidental deletion: confirmation and version restore (SRS L-09).

G. Verification & traceability

32. For each journey, what observable outcome proves the main path works?

Journey	Proof
J1	Test enquiry reaches the admissions mailbox within 1 minute and shows status New
J2	Fee page figures match the approved sheet; prospectus opens
J3	Latest merit list is first and opens
J4	WhatsApp opens to the right number with the program message
J5	Published notice visible publicly within 5 minutes
J6	Status changes appear in history with name and time
J7	Old version retrievable; approver recorded
J8	Personal fields removed; history shows “deleted on request”
J9	New staff member signs in with two-factor and lands on the right page

33. Which alternate and failure paths are essential to test before release?

- Invalid phone; consent not ticked; double submit; form service down.
- Content editor attempting a merit list.
- Session expiry during an edit.
- Five wrong passwords (lock).
- Replacing a merit list.
- Archive date passing.
- Missing PDF; 404 for a removed program.
- WhatsApp not installed (desktop).

34. What test data or example scenarios will cover every role and permission boundary?

Fictional data only: enquirers such as “Test Student One, 0300 0000001, Pharm-D, Sheikhupura”; one test account per role (admissions, editor, administrator, a disabled account); a test merit list PDF marked SAMPLE. Scenarios: each role tries every action in SRS C-02, including the forbidden ones. All test data stays on staging (SRS S-02) and is deleted before launch.

35. How will a reviewer tell that a handoff, message or status change reached the correct person?

Enquiry: the admissions mailbox receives it and the record shows status New; the tester’s inbox receives the auto-reply. Status changes: history shows who and when. Publishing: the public page shows the item and the activity log names the publisher and approver. Alerts: the administrator confirms receipt of a forced test alert.

36. Where should each use case link to requirements, pages, design screens and later tests?

Each journey and use case carries its IDs: Jn / UC-nn → SRS FR and feature IDs (FEAT-00x) → page in the sitemap (Doc 05) → wireframe (Doc 06) → test case in SRS T-03. A simple traceability sheet (one row per use case) is kept with the SRS; Doc 05 and Doc 06 answers reference these same IDs.

H. Completion decisions

37. Which journeys cannot yet be written because a policy, owner decision or dependency is missing?

Journey	Blocked by
J11 Online application	CNIC/B-form data policy, secure storage, legal review (OD-15); phase 2
J12 Open Day booking	Whether Open Days run and their capacity; phase 2
J13 Urdu switch	OD-11
Exact staff screens for J5–J7, J9	Admin tool (OD-05)
J8 time limit and retention	OD-10, OD-15

38. Who will review the journeys with real or representative users, and what feedback must be recorded?

Developer runs short sessions on staging: 3–5 newly admitted students on their own Android phones (J1–J4), 2–3 parents or staff (J1, J2), the admissions officer (J5–J8) and the content editor (J10). Record for each task: completed or not, time taken, where they hesitated, words they did not understand, and suggested fixes.

39. What criteria will make this workflow set complete enough to guide sitemap, design and implementation?

- Every Must journey has a workflow map or use case with success, failure and cancellation paths.
- Every journey has an entry page and an end page in the sitemap (Doc 05).
- Every role boundary is tested by a scenario in Q34.
- Open decisions blocking a journey are logged with owners.
- The approver (OD-01) has signed the journey list.

Workflow map — J1: Find a program and send an enquiry

Journey / ID	J1 · Find a program and send an enquiry
Priority / source	Must · PVS Q15 · FEAT-001, FEAT-003
Starting actor / role	Visitor (prospective student or parent)
Trigger and preconditions	Visitor taps Enquire on Home or a program page. Program list published; form service and admissions mailbox working; privacy policy live.
Goal and successful end state	Enquiry stored as New; admissions emailed within 1 minute; visitor sees Thank-you page and gets auto-reply.

Step / page	User action	System response / decision	Alternate or failure route
1 Home / Programs	Opens a program	Shows facts, intake badge, Enquire	Program withdrawn → message + link to Programs
2 Program page	Taps Enquire	Opens form with program pre-selected	Taps WhatsApp instead → J4
3 Enquiry form	Fills fields, ticks consent	Checks each field on exit	Invalid → message beside field
4 Enquiry form	Taps Submit	Re-checks all, spam check, disables button, "Sending…"	Spam → discarded silently
5 (system)	—	Stores enquiry (New), flags duplicates, emails admissions, auto-reply	Service down/15 s → failure message with WhatsApp and phone; values kept
6 Thank-you page	Reads next steps	Shows call-back promise, hours, WhatsApp link	—

Handoffs, notifications, responsible role	Form service → admissions mailbox (system); admissions officer calls back (J6).
Permissions, accessibility, acceptance evidence	Public, no sign-in; consent required. Keyboard and screen-reader usable; errors announced. Evidence: SRS FEAT-003 tests 1–5.

Workflow map — J5: Publish a notice or merit list

Journey / ID	J5 · Publish a notice or merit list
Priority / source	Must · SRS L-04 · FEAT-004, FEAT-006
Starting actor / role	Admissions officer (content editor for general notices)
Trigger and preconditions	Approved PDF ready; staff signed in with two-factor; approver named for merit lists.
Goal and successful end state	Notice published and visible first on the public list within 5 minutes; activity logged.

Step / page	User action	System response / decision	Alternate or failure route
1 Staff sign-in	Signs in	Lands on role page	Locked after 5 failures
2 Notices list	Clicks Add notice	Opens form	No permission → message
3 Notice form	Enters title, type, program, session, dates; uploads PDF	Checks fields and file; shows preview	Not a PDF / over 5 MB → message
4 Notice form	Clicks Publish	Merit list: dialog naming program and session, asks approver	Same program+session exists → Replace or Cancel
5 (system)	Confirms	Publishes, records publisher, approver, time	Save fails → “Not saved”, data kept
6 Public Notices	—	Item appears first within 5 minutes	Save as Draft instead

Handoffs, notifications, responsible role	Principal or Director approves before step 4 (outside the system in release 1). No visitor notification in release 1.
Permissions, accessibility, acceptance evidence	Merit lists: admissions officer and administrator only; PDF kept out of search engines. Evidence: FEAT-004 tests 1–4.

Workflow map — J6: Handle an enquiry from New to Enrolled

Journey / ID	J6 · Handle an enquiry from New to Enrolled
Priority / source	Must · SRS G-02 · FEAT-006
Starting actor / role	Admissions officer
Trigger and preconditions	Email alert received; enquiry stored as New.
Goal and successful end state	Enquiry reaches Enrolled or Not interested, with every step recorded.

Step / page	User action	System response / decision	Alternate or failure route
1 Email	Opens link	Enquiry detail (sign-in if needed)	Session expired → sign in, return here
2 Enquiry detail	Calls or WhatsApps the person	—	No answer → status Follow-up, note “no answer”
3 Enquiry detail	Sets Contacted, adds note	Saves; history line added	Spam → Spam/Duplicate
4 Enquiry detail	Later sets Visited/Applied, then Enrolled	Saves each change	Changes mind → Not interested
5 Enquiries list	Filters by program and status; exports weekly	Confirmation about personal data; file downloads; export logged	—

Handoffs, notifications, responsible role	None to the visitor automatically; communication is by phone or WhatsApp. Reminder after 1 working day as New (Could).
Permissions, accessibility, acceptance evidence	Admissions officer and administrator only. Evidence: status history shows name and time for each change.

Use case record — UC-01: Submit an enquiry

Use case ID / name	UC-01 · Submit an enquiry
Related requirement / workflow	J1 · FEAT-003 · SRS F-02, F-07, Q-03
Primary actor	Visitor
Other actors or services	Form service, email provider, spam check
Trigger, preconditions, information needed	Visitor on the enquiry form; needs name, mobile, program, city, consent.

Step	Actor action	Website response / data change	Alternative / exception
1	Fills required fields	Validates on exit	1a Invalid field → message (SRS F-07)
2	Taps Submit	Validates all; spam check; token check	2a Duplicate token → same Thank-you, nothing stored
3	—	Creates enquiry: status New, received time, source page	3a Same phone+program ≤7 days → flagged Possible duplicate
4	—	Emails admissions; auto-reply if email given	4a Email bounce → enquiry still stored, administrator alerted
5	Sees Thank-you page	—	5a Service failure → failure message, values kept

Postconditions	Success: one enquiry stored and emailed. Failure: nothing stored, visitor told how else to reach admissions. Cancel: visitor leaves; nothing stored.
Acceptance examples and test evidence	Given a valid form, when submitted, then admissions receives it within 1 minute. Given phone “12345”, when submitted, then the phone message shows and nothing is sent.

Use case record — UC-02: Publish a merit list

Use case ID / name	UC-02 · Publish a merit list
Related requirement / workflow	J5 · FEAT-004 · SRS L-04, G-04
Primary actor	Admissions officer
Other actors or services	Principal or Director (approver)
Trigger, preconditions, information needed	Approved PDF, program, session, approver's name.

Step	Actor action	Website response / data change	Alternative / exception
1	Opens Add notice, type Merit list	Session becomes required	1a Content editor → option unavailable
2	Uploads PDF	Checks type and size; preview	2a Not PDF / >5 MB → message
3	Clicks Publish	Dialog names program and session; asks approver	3a Existing list → Replace or Cancel
4	Confirms	Status Published; logs publisher, approver, time; marks not for search engines	4a Save fails → kept as unsaved, message

Postconditions	Success: list live within 5 minutes, newest first. Cancel: nothing published. Replace: old version kept in history.
Acceptance examples and test evidence	Given a content editor, when they choose Merit list, then they are refused. Given a replaced list, then the previous file is still in history.

Use case record — UC-03: Delete a visitor's data on request

Use case ID / name	UC-03 · Delete a visitor's data on request
Related requirement / workflow	J8 · SRS M-04, M-06
Primary actor	Admissions officer
Other actors or services	Visitor
Trigger, preconditions, information needed	Visitor asks by email or WhatsApp to delete their enquiry.

Step	Actor action	Website response / data change	Alternative / exception
1	Confirms request comes from the same phone/email, or calls back	—	1a Cannot confirm → reply asking them to message from the number used
2	Opens enquiry, chooses Delete personal data	Confirmation: "Delete personal data for [name]? This cannot be undone."	—
3	Confirms	Removes name, phone, email, marks, message; keeps program, city, status and "deleted on request, date"	—
4	Replies to visitor	—	—

Postconditions	Personal fields gone within 14 days of the request (proposed); logged in the activity log.
Acceptance examples and test evidence	Given an enquiry, when deleted on request, then searching its phone number finds nothing and the activity log shows the deletion.
