WEBSITE DEVELOPMENT / DOCUMENT 05 — ANSWERS

Sitemap & Information Architecture

Completed questionnaire: pages, navigation, URLs and how people find things

PROJECT / WEBSITE	Radiant Institute of Professional Studies (RIPS), Sheikhupura — rips.edu.pk
PREPARED BY	Sarosh (website developer)
DATE / VERSION	17 October 2026 / v1.0 draft answers — for review
COVERAGE	39 questions · 8 sections · page inventory (20 rows) · hierarchy and wayfinding worksheet
INPUTS	Doc 01 PVS answers (draft v0.1) · Doc 02 PRD answers (draft v1.0) · Doc 03 SRS answers (draft v1.0) · Doc 04 workflow answers

How to read this. References use the earlier documents' IDs: **PVS Q**n (Doc 01), **PRD Q**n (Doc 02), SRS IDs such as **B-01**, features **FEAT-001…006** and open decisions **OD-01…18** (Doc 03). **Not Decided** names its owner. **Not Applicable** gives a reason. *(proposed)* marks a recommendation the approver must confirm. Program names below are working examples from the institute's public channels — Pharmacy (Pharm-D), Physical Therapy (DPT), Nursing, Allied Health Sciences, Computer Science, Business Studies; exact titles are **Not Decided** — owner: Principal (OD-07).

CONTENTS

Sections and worksheets

A	Source inventory & structure	5 questions
B	Hierarchy & wayfinding	6 questions
C	Page inventory & ownership	5 questions
D	Search, filters & discovery	5 questions
E	URLs & findability	5 questions
F	Access, states & edge cases	5 questions
G	Content relationships & governance	5 questions
H	Acceptance & handoff	3 questions
W	Page inventory	
W	Hierarchy & wayfinding (sitemap tree)	

A. Source inventory & structure

01. Which approved journeys and content types from Documents 01–04 need their own page or section?

Need	Page or section	Source
Find a program (J1)	Programs list + one page per program	FEAT-001, Doc 04 J1
Enquire (J1)	Enquiry page /enquire (also embedded on Contact)	FEAT-003
Admission steps, dates, fees (J2)	Admissions page + Fee structure page	FEAT-002
Notices and merit lists (J3, J5)	Notices list, notice page, Archive	FEAT-004
Contact (J4)	Contact page; WhatsApp/call on every page	FEAT-005
Trust	About, Affiliation & approvals, Faculty	PRD Q8, Q45
News and events (J10)	News list + post page	PRD Q34
Legal	Privacy policy, Terms	SRS O-08
Staff (J5–J9)	Staff area (separate, tool-dependent)	FEAT-006, OD-05

Refinement recorded: SRS D-01 placed the form under Contact. This sitemap gives it its own address (/enquire) so a program can be pre-selected and the link shared; Contact still embeds the same form. Not a conflict.

02. Which existing pages, URLs or content must be kept, merged, rewritten, redirected or retired?

Item	Action
Leadership names and messages, logo	Keep content; rewrite and re-approve
Old WordPress page addresses on rips.edu.pk	Redirect (301) to the nearest new page — list built from Google results and Search Console once verified; no access to the old site
Old pages with no equivalent	Let them return 404 with helpful links — never redirect everything to Home
Template pages seen on test.rips.pk (International, Student KLE, Edumart Online, online MBA, cost-of-living support, staff intranet, demo posts)	Retire; not carried over
test.rips.pk	Take down or hide; if owned, redirect the whole domain to rips.edu.pk (OD-17)
Social media photos and videos	Reuse after approval

03. What are the top-level navigation groups, and what question does each group answer for visitors?

Group	Visitor's question
Programs	What can I study here, and am I eligible?
Admissions	How and when do I apply, and what does it cost?
Notices	Is my name on the merit list? What's the latest announcement?
About	Is this institute genuine and who runs it?
News & Events	Is the institute active?
Contact	How do I reach or visit them?
Enquire (button)	Can someone call me back?

04. Which pages are required for the first release, and which belong to a later phase?

Release 1 Must: Home, Programs, program pages, Admissions, Fee structure, Notices (list, page, archive), Enquire, Thank-you, Contact, About, Affiliation & approvals, Privacy, Terms, 404. **Should:** News & Events, Faculty. **Could:** Campus & facilities, Careers. **Later:** Apply online, Open Day booking, Urdu pages (/ur/), site search results page (PRD Q34).

05. What rule determines whether content is a page, a reusable item, a modal or part of another page?

- **Page:** answers a visitor's question on its own, needs its own address for search or sharing (e.g. a program, Admissions).
- **Reusable item:** structured content shown in more than one place — program, intake dates, fee schedule, notice, news post, faculty member, contact details. Entered once, displayed everywhere.
- **Part of another page:** short content that only makes sense in context — leadership messages (About), FAQs (Admissions), documents list (Admissions).
- **Modal:** only confirmations and the mobile menu; never content people need to find or share.

B. Hierarchy & wayfinding

06. What is the parent page for each page, and how deep should users have to navigate to reach it?

> Maximum depth three levels (Home › Programs › Pharm-D). Every Must page reachable within two clicks from Home. Parents: program pages → Programs; Fee structure → Admissions; notice pages and Archive → Notices; Affiliation, Faculty, Campus, Careers → About; news posts → News & Events. Full tree in the Hierarchy worksheet.

07. Can a page belong to more than one path? If so, which URL and breadcrumb trail are canonical?

> Yes. A program is linked from Home, Programs, the fee table and news posts; a merit list from Notices, Admissions and Home. Each has **one** address and one breadcrumb: the program's is /programs/[name] with Home › Programs › [name]; a notice's is /notices/[name] with Home › Notices › [title]. Faculty's canonical parent is About even though linked from program pages.

08. Which global navigation, local navigation, footer links and in-page links are needed?

> - **Global (header):** logo → Home; Programs, Admissions, Notices, About, News & Events, Contact; Enquire button; phone and WhatsApp icons. Mobile: logo, Enquire, menu button.
> - **Local:** About sub-menu (Overview, Affiliation & approvals, Faculty, Campus, Careers); Admissions sub-links (How to apply, Fees, Dates, Documents, FAQ); Notices filters.
> - **Footer:** address, phone, WhatsApp, email, office hours; program links; Admissions, Fees, Notices; About links; Privacy, Terms; social links; affiliation logos.
> - **In-page:** program page → Enquire (pre-selected), Fees, related programs; Admissions → Fees, prospectus, Enquire; notice page → other notices for the same program.

09. What labels will website owners and typical users understand without insider terminology?

> Use: Programs, Admissions, Fees, Notices & Merit Lists (short form "Notices" in the header), About, Contact, Enquire, Apply (later). Avoid: "Faculties", "Schools", "Institutes", "KLE", "CPD", "Edumart" (template jargon from the old site), "Courses" as a group name (keep the word in program text so search still finds it). Program names use the common form first: "Pharm-D (Doctor of Pharmacy)". To be checked in the tree test (Q21).

10. How can users return to the previous level, jump to a related topic or resume a task?

> Breadcrumbs on all level-2 and level-3 pages; browser Back never broken; "Back to Programs" and "Back to Notices" links; related-program links on program pages; filters kept in the address so returning restores the view. Tasks cannot be resumed after leaving the form (no drafts for visitors, SRS F-08).

11. Where should important actions appear when a user arrives directly from a search result or shared link?

> Every landing page shows, without scrolling on a phone: the page title, the key fact (e.g. program duration and intake status, or notice date), and the Enquire button. A floating WhatsApp button stays on every page. Notice pages show the PDF link first, then "See all notices".

C. Page inventory & ownership

12. For every page, what is its purpose, audience, primary action and key content?

> Given in the Page inventory worksheet at the end (one row per page or template), following SRS D-04.

13. Who creates, approves, translates and keeps each page accurate?

Pages	Creates	Approves	Keeps accurate
Program pages	Heads of department	Principal	Content editor, each intake
Admissions, Fees, intake dates	Admissions officer	Principal or Director	Admissions officer, each intake
Notices, merit lists	Admissions officer	Principal (merit lists)	Admissions officer
About, Affiliation	Director	Chairman or Director	Director, yearly review
Faculty, Campus, News	Content editor	Principal	Content editor
Privacy, Terms	Developer drafts	Director (legal review OD-15)	Developer, yearly

Translation into Urdu: **Not Decided** — owner: Director (OD-11); translator to be named when decided.

14. Which pages require a template shared across many items, such as articles, services or products?

Program page; notice page; news/event post; faculty card (within the Faculty page); list pages (Programs, Notices, News) share one list template. Standard text page template for About, Privacy, Terms.

15. Which pages have variants by language, location, account type or device size?

Language: Urdu variants of key pages later (/ur/...), OD-11. Location and account type: **Not Applicable** — one campus site, no visitor accounts. Device: every page adapts to screen size; no separate mobile pages.

16. What metadata, publication date, review date or source attribution should appear with content?

Content	Shown to visitors	Internal only
Program, Admissions, Fees	“Last updated [date]”	Approver, next review date (each intake)
Notices, merit lists	Published date, program, session, file size	Publisher, approver, archive date
News	Date	Author
Affiliation	Issuing body and letter date	Expiry date if any

D. Search, filters & discovery

17. What content should on-site search include or exclude for each role?

Site search is a Could for release 1.1. When built: include public pages, programs, notices (titles), news. Exclude drafts, archived-only items (unless searching the archive), merit-list contents, staff area, Thank-you and legal boilerplate. Staff search covers enquiries (name, phone) for admissions only (SRS H-02).

18. Which filters, categories, tags or sort choices would genuinely help people find an item?

> Programs: field (Pharmacy, Physical therapy, Nursing, Allied health, Computing, Business) and level. Notices: program, type (Admission, Merit list, Exam, General), session; newest first. News: none needed at launch volume. No free-form tags.

19. What should happen for no results, too many results, misspellings or unavailable content?

> As SRS H-05 and PRD Q71: no results → clear message, Clear filters button and contact link; too many → 10 per page; misspellings → show the full program list below the search box; unavailable program → page stays with a "Not offered this intake" badge.

20. What related-content links or recommendations should be shown, and by what rule?

> Program page: up to 3 programs in the same field, then latest notices for that program. Notice page: other notices for the same program and session. News post: 3 latest posts. No personalised recommendations.

21. How will you test whether users can find the most important pages without being told where they are?

> A tree test (text-only menu) and a first-click test on the wireframes with 5–8 representative users, using the tasks in Q37. Pass: at least 80% find each task's page on the first path, with no task below 60% (proposed). Fix labels or structure and retest before design sign-off.

E. URLs & findability

22. What readable URL pattern should each page type use, and who approves changes to it?

Page type	Pattern	Example
Top pages	/[name]	/admissions, /contact
Program	/programs/[short-name]	/programs/pharm-d
Fee structure	/admissions/fees	—
Notice	/notices/[session]-[short-title]	/notices/2026-27-pharm-d-merit-list-1
Notice archive	/notices/archive	—
News	/news/[short-title]	/news/open-day-november
About sub-pages	/about/[name] (Affiliation); /faculty; /campus; /careers	/about/affiliation
Enquiry	/enquire?program=[short-name]	/enquire?program=dpt
Urdu (later)	/ur/[same path]	/ur/admissions

> Lowercase, hyphens, English words, no dates in program URLs, no file extensions. Developer proposes; Director approves any change to an existing address; every change gets a 301 redirect.

23. What happens to old links when a page is moved, renamed, unpublished or removed?

> Moved or renamed: permanent 301 redirect from the old address, kept for at least 2 years. Unpublished notice: "This notice is no longer available" page with a link to current notices (SRS D-06). Removed program: page stays with "not currently offered" for one intake, then redirects to Programs. Redirect list kept in the code repository.

24. Which pages should search engines index, and which private or temporary pages should they avoid?

> **Index:** Home, Programs and program pages, Admissions, Fees, About, Affiliation, Faculty, Campus, News, Contact, notice list and general notice pages. **Do not index:** merit-list PDFs and pages (student names), Thank-you, /enquire with parameters, filtered list views, staff area, staging, 404, Terms (optional). Sitemap.xml lists only indexable pages.

25. What titles, descriptions and social-sharing summaries are needed for public pages?

> Title: "[Page] | RIPS Sheikhupura", under 60 characters (e.g. "Pharm-D Admissions 2026 | RIPS Sheikhupura"). Description: one sentence under 155 characters with the key fact. Sharing preview: title, description and an image (program photo or a default image with the logo) for WhatsApp and Facebook. Programs also carry structured data for an educational organisation and course (SRS B-01).

26. Are there duplicate-content, pagination or multilingual URL choices that need a rule?

> - One host: https://rips.edu.pk; www and http redirect (SRS S-03).
> - Filtered views point search engines to the unfiltered list (canonical).
> - Paginated lists (?page=2) are crawlable and self-canonical.
> - Trailing slash: one form only, the other redirects.
> - Urdu: /ur/ paths with language annotations (hreflang) linking each English and Urdu pair.

F. Access, states & edge cases

27. Which pages are public, signed-in, role-restricted or visible only to an item owner?

> Public: every page in the Page inventory. Signed-in staff: staff area. Role-restricted: enquiries (admissions, administrator), users and activity log (administrator). Item-owner-only: **Not Applicable** — no visitor accounts.

28. What should a user see for a missing page, forbidden page, expired link or deleted item?

> Missing: 404 page with links to Programs, Admissions, Contact. Forbidden (staff area): sign-in page, or "You do not have permission" for a signed-in user without the role. Expired staff link: "This link has expired. Request a new one." Deleted notice: "This notice is no longer available." (SRS D-06, Q-01).

29. How should the site handle empty sections, unpublished content and items pending review?

> Empty lists show a friendly empty state (SRS D-07). News & Events stays out of the main menu until at least 3 posts exist (proposed). Careers with no openings says "No openings right now — send your CV to [email]". Draft and In-review items never appear publicly or in the sitemap.

30. Can users enter a protected page through a direct link and return after sign-in?

> Yes for staff: a direct link (e.g. from the enquiry email) leads to sign-in and then back to the same item if the role allows it. Visitors have no protected pages.

31. Where could page labels, navigation order or breadcrumbs fail for keyboard or screen-reader users?

- Mobile menu: must trap focus while open and close with Esc.
- About sub-menu: must open by keyboard, not hover only.
- Icon-only phone and WhatsApp links: need text labels.
- Breadcrumbs: need a labelled navigation region and “current page” marked.
- Two navigation regions (header and footer) need different labels.
- Header order must match visual order.

G. Content relationships & governance

32. Which content items link to or reuse other items, and what happens when a linked item changes?

Item	Used by	When it changes
Program	Programs list, Home cards, fee table, enquiry dropdown, notices filter	All places update; withdrawn programs leave the dropdown and filters
Intake dates	Admissions, Home strip, program badges	Badges recalculate automatically
Fee schedule	Fees page, program pages	Both update; old version kept
Contact details	Header, footer, Contact, Thank-you, error messages, auto-reply	Edited once, everywhere
Notice	Notices list, Home strip, program pages	Archived notices leave Home and program pages

33. What naming convention will keep pages, navigation labels and internal content references consistent?

One official institute name (OD-09). Program short names fixed in one list (e.g. Pharm-D, DPT) and used for labels, URLs and filters. Notice titles: “[Program] — [Type] [number], [Session]”, e.g. “Pharm-D — Merit List 1, 2026–27”. Navigation labels match page titles. Internal IDs: FEAT, J, UC, OD as in Docs 03–04.

34. Who can add, move or remove a page, and how is that change reviewed?

New page types or menu changes: developer, after the Director approves. New items within an existing template (program, notice, news): role owners per Q13. Removing or moving any page needs a redirect and the Director’s approval; the developer updates the redirect list and sitemap.

35. What is the process for spotting orphan pages, broken links and outdated content?

Monthly: automated broken-link check and comparison of the sitemap with the menu (any page not linked from navigation or another page is an orphan). Each intake: “last updated” review of program, admissions and fee pages. Search Console coverage and 404 reports checked monthly. Findings go to the developer’s backlog.

36. Which decisions here depend on a CMS, translation workflow or legal content approval?

Content editing roles and how reusable items are stored: OD-05 (admin tool). Urdu paths and translators: OD-11. Privacy, Terms and affiliation wording: legal review OD-15 and OD-08. Merit-list indexing rule: institute policy, confirmed by the Director.

H. Acceptance & handoff

37. Which five to ten findability tasks should a reviewer be able to complete from the proposed sitemap?

1. Find the yearly fee for Pharm-D.
2. Find the eligibility for DPT.
3. Find the latest merit list for your program.
4. Find when admissions close.
5. Find proof that RIPS is affiliated.
6. Get directions to the campus.
7. Send an enquiry about Nursing.
8. Read the Principal’s message.
9. Download the prospectus.
10. Contact admissions on WhatsApp.

38. How will you confirm that every must-have workflow has an entry point and destination page?

A cross-check table: each journey J1–J10 (Doc 04) against its entry page(s) and end page in the Page inventory. Any journey without both is a gap to fix before design. Currently all Must journeys have both.

39. What counts as approval of the sitemap and page inventory, and what remains Not Decided?

Approval: tree test passes (Q21), the journey cross-check is complete (Q38), and the approver (OD-01) signs the Page inventory and Hierarchy worksheets. Still Not Decided: exact program titles (OD-07), Urdu pages (OD-11), old-URL redirect list (needs Search Console access), whether News is in the main menu at launch, Careers and Campus in release 1.

Page inventory

Page / URL	Parent / nav label	Audience / access	Purpose / main action	Content owner / status
Home /	— / logo	All · public	Orient; route to Programs, Admissions, Enquire	Director · Must
Programs /programs	Home / Programs	Students, parents · public	Compare programs; open one	Content editor · Must
Program /programs/[name]	Programs / (program name)	Students, parents · public	Understand program; Enquire	HOD → Principal · Must
Admissions /admissions	Home / Admissions	Students, parents · public	How and when to apply; download prospectus	Admissions · Must
Fee structure /admissions/fees	Admissions / Fees	Parents · public	See fees; download PDF	Admissions · Must
Notices /notices	Home / Notices	Current students, applicants · public	Find latest notice; filter	Admissions · Must
Notice /notices/[name]	Notices / —	Applicants · public (merit lists not indexed)	Open PDF	Admissions · Must
Notice archive /notices/archive	Notices / Archive	All · public	Find older notices	Admissions · Must
Enquire /enquire	Header button / Enquire	Students, parents · public	Send enquiry	Admissions · Must
Thank-you /thank-you	— (not in nav)	Enquirers · public, not indexed	Confirm; next steps	Developer · Must
Contact /contact	Home / Contact	All · public	Call, WhatsApp, directions, form	Admissions · Must
About /about	Home / About	Parents · public	Who runs RIPS; messages	Director · Must
Affiliation /about/affiliation	About / Affiliation & approvals	Parents · public	Verify affiliation; view letters	Director · Must (wording OD-08)
Faculty /faculty	About / Faculty	Parents · public	See qualified staff	Content editor · Should
News & Events /news, post /news/[name]	Home / News & Events	All · public	Show activity	Content editor · Should
Campus /campus	About / Campus & facilities	Parents · public	See labs and facilities	Content editor · Could
Careers /careers	About / Careers	Job seekers · public	See openings; email CV	Director · Could
Privacy /privacy, Terms /terms	Footer	All · public	Explain data use	Director (legal) · Must
404	—	All	Recover	Developer · Must
Staff area	— (separate address)	Staff · signed-in, role-based	Publish; manage enquiries	Administrator · Must (tool OD-05)

Unresolved ownership, redirects or missing content	• Exact program list and titles (OD-07). • Old URL redirect list — needs Search Console access to rips.edu.pk. • Affiliation letters and wording (OD-08). • Whether News & Events is in the main menu at launch (needs 3 posts). • Owner for Careers page.

Hierarchy & wayfinding

Site / version	rips.edu.pk · sitemap v1.0 draft
Reviewer / date	Approver (OD-01) · date of sign-off
Top-level navigation and purpose	Programs (what can I study) · Admissions (how and when, what cost) · Notices (latest and merit lists) · About (is it genuine) · News & Events (is it active) · Contact (reach or visit) · Enquire button (call me back)

Home `/`

- ├ **Programs** `/programs`
  - ├ Pharm-D `/programs/pharm-d` · DPT · Nursing · Allied Health Sciences · Computer Science · Business Studies *(titles OD-07)*
- ├ **Admissions** `/admissions` — sections: How to apply · Dates · Documents · Scholarships · FAQ
  - ├ Fee structure `/admissions/fees`
- ├ **Notices** `/notices`
  - ├ Notice page `/notices/[name]` (merit lists not indexed) · Archive `/notices/archive`
- ├ **About** `/about` — sections: Overview · Vision & mission · Messages · Leadership
  - ├ Affiliation & approvals `/about/affiliation` · Faculty `/faculty` · Campus `/campus` (Could) · Careers `/careers` (Could)
- ├ **News & Events** `/news` → post `/news/[name]`
- ├ **Contact** `/contact`
- ├ **Enquire** (header button) `/enquire` → Thank-you `/thank-you` (not indexed)
- └ Footer only: Privacy `/privacy` · Terms `/terms`

Separate, protected: Staff area (address set by the tool, OD-05) — sign-in, dashboard, enquiries, content, files, users, activity log. Not linked from public pages; not indexed.

Later: /ur/... Urdu pages · /apply · /open-day · /search

Orphan pages, redirects and findability tasks to test	Thank-you and 404 are intentionally unlinked. All other pages are linked from the menu or a parent. Redirects: old WordPress addresses (list pending), www and http. Findability tasks: the ten in Q37.
